

STREAMLINE YOUR ENGINEERING RELEASE PROCESS BY 80%

CADTalk integrates your CAD software with Syteline so you can get the designs to the shop floor in record time without all the headaches.

The Value of CADTalk:

- Significant reduction in manufacturing lead time.
- Eliminates duplicate data entry
- Increases data integrity and BOM accuracy
- Ongoing support for future CAD and Syteline version releases
- Delivered and supported by Certified Infor Partner

Key Features:

- Map CAD properties to Syteline fields (UETs included!)
- Directly read CAD files (no CAD software required!)
- Expression builder for user defined options
- Work with fully exploded BOMs
- Optimized interface for quick and accurate BOM creation

Also Compatible with
Pro-E/Creo Siemens NX
CATIA Altium
and More

Products carrying this logo are not necessarily Autodesk products and as such are not warranted by Autodesk. Autodesk AutoCAD, Autodesk Inventor, and Autodesk Vault is a registered trademark of Autodesk, Inc
